

Holy Innocents' New Parish Centre, a phoenix arising from the ashes...
December 2019 to....2020

The old building having been removed work began on the foundations for the new centre.
For a time I took photos regularly from the window in the corner of the church until the brickwork had risen to make any further viewing unproductive, so from then on I took photos from Mitchell Road.

A phoenix arising from the ashes of the old!!

<< The foundations
are begun, the
cementing is done

The bricks are in line, >>
let the weather remain
fine

<<< a 'bare canvas' lies before
Soon will come the floor!

with window dirty and unclean,
little can be seen >>>>>

<< through open window see
the bricks laid evenly

The floor is being laid >>>>>>>
materials are top grade!

<<<< open window shows it well
the work is really swell

Posts they are in place>>
keep watching this amazing space!

The building is growing higher, the daffodils in bloom, every single day taking shape is every room!

The above were the last photos taken before the Coronavirus covid 19 prevented free movement.

The following are photos taken by Father Victor.

The roof is taking shape, all is coming on, whilst all the people are praying for covid 19 to be gone!

Adoration room is seen like a castle taking form, can't wait to see inside to see how the walls they will adorn?

Now a roof 's in place, the building's growing fast,

<<<<<<<<<It won't be long I'm sure
till we can see it at long last

A different view now seen, from presbytery view, amazing is such a sight, long we have so waited but it'll be worth it that is right!

Slightly different angle, so much to be seen
Blessed be those builders
for working like a dream!

All that wood and bricks! A puzzle to be solved, my how this building truly has evolved!

The roof is taking shape, exciting now to see.... Imagine using it soon ...How wonderful it will be

A photograph of a church with a steep, dark roof and a tall, thin spire. The church is surrounded by scaffolding and construction materials, indicating ongoing renovation or restoration work. The foreground shows a grassy area with some yellow flowers.

<<<<,Work takes place though all else
are at home,
whilst builders carry on all alone.

A roof in place at last we see,
amazing work for all to see>>>>

<<<<<<Another
roof is put in place,
one step nearer oh
what a grace!

Here the men are feverishly working and none can say they are shirking!

<<<Windows let in light so all is neat and bright!

Impressive is the view,
it looks magnificent too! >>>>>>>>

What a transformation... from chaos to new build. The vision of an architect an expert in his field!

There's going to be a green roof, gee now that sounds grand!
All done in the name of ecology, that's what everyone planned!

Wow it's already there.. a roof so awesome to see,
no eyesore for the community, I trust you all agree?

Despite the covid pandemic, the builders continued to work,
diligent in their endeavours, its growth must be their perk!

An eco-friendly roof pleasing to the eye, and this is just the outside...we'll see the inside by & by

Here there is a man perched up on the roof, one of the busy workforce, and that folks is the truth!

A slightly different angle, showing round the side, can't wait to see what it looks like on the inside!
